

PPM Ops PROGRAM

Project and Portfolio Management Operations

PPM Ops enables stress-free, aligned and focused work across the entire enterprise.

What is PPM Ops?

PPM Ops is an integrated set of management principles, practices, and tools that help organizations successfully adapt to changes, achieve outcomes at scale, and grow a culture of collaboration and common purpose orientation.

Why choose the PPM Ops program?

- 1 Outcomes at Scale**
Achieve better business outcomes through focused and aligned work in only 6 months.
- 2 Thought Leadership**
Strengthen the core leadership team's skills to develop the organization's ability to learn and adapt in an uncertain environment.
- 3 Continuous Evolution**
Create internal champions capable of evolving the organization further after the program's end.
- 4 Cost & Time Savings**
Save years of implementation time, energy & transformation investment compared to other alternatives.
- 5 Minimized Risk**
Minimize the risk of abandoning the practices once the program is over.

What is included?

Two PPMOps-based appraisals at the start and end of the program

Coaching sessions with the core leadership team between the trainings

Eight 4-hour workshops throughout the program

3 progress tracking meetings with the company executive management

How it works

The program engages the organization's core team in the process of developing the expertise necessary to train others internally. Our focus is on enhancing participants' abilities to introduce and consistently improve project and service flow management practices.

Suitable for

The PPM Ops program is suitable for CTOs, CIOs, Department Managers, PMO Directors, Program Managers, Project and Product Managers, Change Agents, or anyone interested in introducing effective practices and a culture of collaboration, customer and outcome orientation.

The program runs for 6 months and is adjusted to your organization's needs

Use the Businessmap Software Platform free for 6 months

Every participant receives a certificate of completion

There are no special prerequisites for the program

Benefits

Instant visibility of the status of projects, portfolios, and business as usual

Understanding of the causes for delays and extra costs and how to eliminate them

Explicit priority and decision-making policies and criteria

Effective communication and coordination between teams and projects

Consistent project portfolio, service and operations management processes

Sustainable predictability based on actual flow-related data and metrics

Stronger culture of collaboration and focus on customer and business purpose

Roadmap to evolving the organization further in alignment with PPM Ops
